AVIS Philippines

40 Years

BEYOND SERVICE EXCELLENCE

1972 - 2012

It all began when Warren E. Avis, who founded Avis, a Detroit Ford dealer, foresaw the rapid development of commercial aviation following World War II. He reasoned that travelers, particularly businessmen, needed convenient ground transportation at their destination airports. So he opened the first airport rent-a-car counter at Detroit's Willow Run Airport in December 1946. Almost simultaneously an Avis location opened at Miami International Airport, then America's busiest rent-a-car market, and many more followed.

The rest, as they say, is history. Today, Avis is a worldwide leader in the vehicle renting and leasing business with a number of 'firsts' to its credit. This includes the launching the first central billing charge card system in the rent a car industry for corporate accounts.

A significant development in 1962 was the introduction of a bold new Avis advertising campaign... "We're only No. 2. We Try Harder" – then acknowledged as one of the ten best advertising slogans of all time.

Within two years of the campaign's launch, Avis has significantly improved its market share and moved its earning record solidly into the black.

In 1972, Avis introduced another major innovation to the rent a car industry when it unveiled its Wizard computer system in the U.S. This was the first on-line, real time rental, reservation and management information system in the industry. The system performs reservations and rental counter functions and vehicle inventory control. It keeps vehicle maintenance and repair records, as well as flags cars for preventive maintenance services. It can also generate reports that can be delivered electronically to the client.

New ideas, techniques, and services have been implemented by Avis people with energy and enthusiasm- The essentials of the 'We Try Harder' spirit.

Avis in the Philippines

Avis came to the Philippines in 1972, thanks to the foresight and initiative of one man: Domingo M. Guevara Sr.

It was the Guevaras, the car manufacturing and electronics pioneers of Sakbayan and Radiowealth fame, who acquired the Avis franchise that year.

In the 1950s the family first began importing and assembling Volkswagens, so Avis was a natural extension, and the Guevara's contacts in the industry proved extremely beneficial.

Avis Philippines started off at the corner of Pasong Tamo Street and Buendia (now Sen. Gil Puyat) Avenue in Makati City with just one small rental station and 5 Volkswagen Beetles. In the following years, the company has grown steadily and consistently. This has made Avis one of the industry's oldest and biggest firms in the country.

Avis Philippines is constantly moving onwards and upwards. Starting with a fleet of cars serving as taxis at the airport, it has extended its services to a wider segment and branched out to reach more customers nationwide through the years, maintaining its global standard.

Now reaching 20 rental locations throughout the country, Avis Philippines offers an unrivalled service to customers.

continued on next page

[illegible] anniversary, from page

To further its drive to excellence, the metered taxi service has been converted to more favorable and convenient services: the Self Drive and Chauffeur Driven rentals. In addition, Avis has also extended to short-term rentals, car hire (with a minimum of 3 hours), airport transfers, airport/seaport-connect, pick up and drop off, wedding car service, and vehicle leasing.

Avis is always ready to respond to your transport needs, 24 hours a day and 7 days a week, with 17 rental stations nationwide. From leisure to business, Avis is committed to delivering car rental services with the highest standard of honesty, trust and professionalism.

Avis Philippines has been recognized twice in 2011: Top Brand Awards for being Most Outstanding Rent A Car Service Provider and Consumers Choice Award Most Outstanding Car Rental.

The air you breathe makes a difference

Studies link higher levels of air pollution with lower life expectancy. Older people are more sensitive to the effects of air pollution and recent research suggests that women may be at greater risk than men.
